

RUN DOWN.

Two Vessels Crash Together in a Fog.

Five Persons Lose Their Lives and Several Are Injured.

One Unfortunate Remains Wedged in the Debris—Terrible Accidents on the Pacific Coast—Both Vessels, Deceased and Passengers Taken to Seattle.

SEATTLE, Wash., Oct. 10.—The Canadian Pacific Navigation Co. steamer Premier was struck by the steam collier Willamette in a dense fog off Whidby Island, about ten miles south of Port Townsend Saturday afternoon. Four were killed, one drowned and seventeen badly wounded. The steam tug Gollah arrived here Sunday morning with three of the dead, all of the wounded and other passengers, after having spent several hours in an attempt to save from the wreck the body of an unknown passenger wedged in there.

The Premier left Port Townsend about 1:50 o'clock Saturday for Seattle in a heavy fog, blowing her whistle continuously. When off Point-no-Point another whistle sounded close by, and almost immediately afterward a terrific crash was heard. The fore cabin of the Premier was smashed to splinters and the prow of the Willamette was found jammed right into the bow of the Premier.

The Willamette was laden with coal, and was on her way from Seattle to San Francisco. There were a number of men in the Premier's cabin, one of whom was killed, together with a boy. A steward who was in the saloon eating his dinner was instantly killed. Several other passengers were jammed in the debris, some of them seriously wounded and all more or less bruised. The stern of the Willamette was so deeply imbedded into the Premier that the passengers scrambled over broken woodwork and onto the collier. The ladies were handed up first, followed by the wounded as fast as they could be moved. Men with broken limbs, and both men and women with bleeding faces and bodies were helped up. It was soon seen to be impossible to draw off the Willamette without sinking the Premier, so Capt. Anderson determined to force ahead, driving before him the steamer splined on his bow. He forced her back to the beach and was so tightly wedged that he could not back off without dragging the Willamette with him.

The tug Gollah, towing out a schooner, was halted and she took off the passengers, bearing them to Seattle, where they arrived about midnight. The receding tide left both stranded and still interlocked. It was feared that the bow of the Willamette was partly stove in, although the whole affair was over in a few moments and the passengers quickly recovered from their momentary shock and fright. There were some pitiable scenes. One man, whose name is unknown, was crazed with fear and immediately sprang overboard.

MUST BE STOPPED.

Pension Bureau Employees Can Not Visit Pool Rooms.

WASHINGTON, Oct. 10.—At the investigation into the management of the pension bureau during the last session of congress testimony showed that a number of clerks in the pension bureau were wont to frequent the pool rooms at Jackson City, Va., a sporting resort across the Potomac river from Washington.

Commissioner Baum has just issued an order, which is believed to be the outcome of this evidence. It prohibits the clerks in the pension bureau from visiting Jackson City, under penalty of recommendation for dismissal, "on the ground that such conduct is calculated to bring discredit upon the personnel of the office."

A number of clerks in other branches of the government service visit Jackson City, and it is said heads of the different bureaus are considering the advisability of issuing a similar order to that of the pension commissioner.

BOUNDARY SURVEY.

Some of Our Territory Thrown Into Mexico by It.

SAN ANTONIO, Tex., Oct. 10.—F. P. Carrollo, a merchant of Frontera, Mex., which was supposed to be located on the line between Mexico and the United States, arrived here Sunday. He states that the international boundary survey has been completed some distance past that place, and that the old boundary line has been greatly changed. The custom-house at Frontera was found to be nearly four miles south of the line, and its removal to the line has been ordered. Several rich mining properties, which for the past several years have been worked under the United States mining laws, are in Mexico under the new survey, and the owners are very much exercised, as it means a heavy loss to them on account of the duties on the ore, which is smelted in the United States. Those engaged in making the survey have suffered many hardships owing to the lack of water, and many desertions from the laboring corps have occurred.

Chinese With a Dreadful Disease. New York, Oct. 10.—The German steamer Tetartos arrived Sunday morning, from the Philippine Islands, with nearly all of her crew suffering from a disease seldom seen in the Western hemisphere, and which Chinese and Japanese sailors fear almost as much as they do leprosy. It is known in China and Japan as "best-bert." It causes the abdomen and lower limbs to swell to an immense size, and pure physical agony causes death. The crew of the Tetartos are all Chinese.

JESTS IN JINGLES.

He said he was a self-made man
And often made his boast of it,
For as he'd had a lowly start
He thought he'd make the most of it.
But when he married, 'tis believed
His wife condemned the plan of him.
For when a year had passed, 'twas said
She'd made another man of him.

The Chesapeake and Ohio Railway seem to be catching all the opera troupes this season, as there is not a day but one or two passes over that line.

ANOTHER CRIME-AN WAR.

The Charge of the "Light" Brigade Recalls to the Cincinnati Courtroom.

In Saturday's proceedings in one of the Cincinnati courts an affidavit was filed by Thomas Mangano, a member of the Village Council of Carthage and of the Committee on Light, in which the charge is made that D. J. Hauss offered him a bribe for his influence as a member of that committee in the matter of awarding the electric lighting contract. The statement is that Mr. Hauss went to the affiant and said that he believed the other two members of the committee were favorable to the Post-Glover Company. The affiant was the only remaining member of the committee. Mr. Hauss is represented as saying he was desirous of securing his services in the behalf referred to, and that he would pay him for such services \$50 and perhaps more. The affidavit is for use in the suit to enjoin the awarding of the contract to the Post-Glover Company.

Mr. Hauss is the gentleman who recently filed suit against the Electric Street Railway Company of this city.

Value of "In Haste" on a Letter.

If you wish to send a letter away in a hurry, be sure to write "in haste" upon the envelope. The Postmaster and clerks will fall over each other in their haste to get it into the first mail; then the Postal Clerk will yell to the engineer, "Pull her wide open. Here is a letter that is in a rush!" And the train will just fly. It is expensive for the railroads, as accidents are liable to happen and the officials will not thank you for giving it away, but that is the way to get your letters through real quick.

McCartney Campaign Club.

He's a Nick Article.

A few days since a man named Charles B. Camp was in Richmond representing The Western Advocate, a paper said to be published in Chicago, and left the impression that he was the originator of a scheme to run a number of free excursions from Chicago to the "Bluegrass Region." He also proposed to publish in his paper articles concerning the various cities of Central Kentucky which would be profusely illustrated and contain complimentary notices of each. He collected a dollar in advance from a number of people there, then mysteriously disappeared, since which time nothing has been heard from him. Winchester, Georgetown and other Kentucky towns were caught by the same sharper, and in the same way.

DANVILLE, Ky., Oct. 10.—Creed S. Cardwell, who was killed in a fight with moonshiners at Minville, Tenn., was well-known throughout Central Kentucky as a prompt and courageous officer and a man who feared no man. CELEBRATION.

New York's Six Days' Columbian Jubilee.

There Will Be A Parade of 40,000 School Boys.

One Hundred Thousand Civilians and Military, a Stupendous Naval Display, With Plenty of Fire Works—A Celebration Long to Be Remembered.

NEW YORK, Oct. 10.—Every nationality under the sun, excepting, perhaps, the Hottentots and Chinese, will take part in the celebration commemorative of the discovery of America by Columbus, to be held in this city during six days, beginning Saturday. And, to judge by the programme prepared, it will surpass in grandeur and size any thing any of the numerous nationalities taking part ever before beheld. The programme has been completed. The order of each days exercises has been arranged.

It will be a celebration that will long be memorable. Nothing like it has ever before been seen and this generation will not see it again. It is almost one continuous line of decoration, not only on Broadway but on the less prominent thoroughfares. And from the general effect there appears to be enough flags bunting and drapery of various kinds to encircle the globe with a monstrous band of red, white, blue, green and yellow.

The services Saturday and Sunday were religious. Saturday the Hebrews, Sunday the Christians offered thanks to the Almighty, each after his manner of belief, for having guided Columbus to America and for having established here a government of religious freedom. There will be a parade of students and schoolboys Monday morning at 10 o'clock. It will be a parade that could be hardly reproduced, in any other country in the world. It will be 40,000 strong. There will be 10,000 sturdy students from New York public schools; 10,000 free school children; 3,000 youths from the parochial schools, and 3,000 college students, 1,000 of whom will appear in caps and gowns. It will be a magnificent display of the rising generation, a sample of what may be expected twenty years hence. Included in this parade will be 300 Indian boys from the government school at Carlisle.

"The triumph of Columbus" will be sung by a chorus of 800 voices at the Carnegie music hall in the evening, and after that is over the great bridge across East river will be illuminated.

Colored fires will be burned on top of the lofty piers and the huge girders and monster cables will be lit with a glitter of electric lights. The naval parade will be the feature of Tuesday's programme. In that will appear war ships from all the great powers of the earth. The pick of England's navy, men of war from France, Italy and Spain, swift cruisers from the navies of Germany, Russia and Austria and the Philadelphia, Atlanta, Vesuvius and Minionomoh of the white squadron floating the glorious stars and stripes. The sister republics of South America will also be represented. Plucky little Chili will send famous Capt. Pratt as a representative of her naval power.

Following the vessels of war will come the fleet ocean grayhounds, then will come one hundred and twenty merchantmen and steam yachts. In the entire parade it is estimated there will be from two hundred to three hundred vessels.

In the evening the Roman Catholic societies will parade and be reviewed by Archbishop Corrigan; the German singing societies will at the same time give a concert at the Seventh regiment armory. But the greatest attraction of the night will be at the Brooklyn bridge. From the lofty arches of that modern wonder will be given a display of fireworks that will startle even the old Fourth of July veterans. From the top of the great span to the water will be a "Niagara Falls" of fire five hundred feet long and one hundred and eighty feet high. Then there will be marvels of Roman candles, sky rockets and colored fire. The display will cost \$3,000.

On Wednesday the parade will take place. It will surpass anything in the way of a parade that has yet been produced in New York or in America since the close of the war. The United States army will lead the way, then will come the militia of New York and the visiting states and following these will come the various societies and organizations, social and religious. It has been estimated that one hundred thousand men would appear in this parade. This committee in charge has arranged for the distribution of 80,000 American flags at regular intervals so that the stars and stripes will wave continuously from one end of the procession to the other. At different points along the route reviewing stands have been erected. These will accommodate 50,000 spectators.

At the conclusion of the parade the monument of Columbus at Fifty-ninth street and Eighth avenue will be dedicated. In the evening there will be a pageant that will, it is said, surpass the Velled Prophet procession of St. Louis, or Mardi Gras of New Orleans.
